

SAI KHANTH K A

Cloud & DevOps Engineer

Bengaluru, India • khanthsai@gmail.com • +91-9071288197 • linkedin.com/in/saikhanth

PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with hands-on Azure, Docker, Kubernetes, and CI/CD pipeline experience from Cognizant's DevOps training track, backed by a programming foundation in Python, Java, and C from a B. Tech in Electrical & Electronics Engineering. Microsoft Certified (AZ-900, AZ-104, AZ-400). Builds infrastructure-as-code with Terraform and automates deployment workflows using Python and Shell scripting on Linux. Seeking to apply pipeline automation and release engineering skills to a junior cloud/DevOps role.

CERTIFICATIONS

- Microsoft Certified: DevOps Engineer Expert (AZ-400)
- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Anthropic: Claude Certified Architect - Foundation

TECHNICAL SKILLS

- Cloud Platforms: Microsoft Azure, GCP
- DevOps & IaC: Azure DevOps, Terraform, Git, CI/CD pipeline design
- Scripting & OS: Python, Shell Scripting, Linux
- Containerization & Orchestration: Docker, Kubernetes (AKS)
- Programming: Java, C/C++, DSA fundamentals

PROFESSIONAL EXPERIENCE

Cloud & DevOps Engineer (Trainee → Programmer Analyst)

Cognizant Technology Solutions | July 2025 – Present

- Built a CI/CD pipeline covering build, containerization, and deployment stages, cutting manual deployment steps by consolidating workflows into Azure DevOps using Docker, Kubernetes, Git, and Linux-based environments.
- Automated recurring build-validation tasks by writing Python and Shell scripts, reducing manual pipeline checks per release cycle.
- Managed the end-to-end change request lifecycle for production releases by validating change documentation, scheduling deployment windows, and coordinating cross-team approvals through ServiceNow.
- Promoted from Trainee to Programmer Analyst within 12 months based on performance review outcomes.

PROJECTS

Automated CI/CD Pipeline for Containerized App on Azure AKS

Personal Project | Terraform, Docker, Kubernetes, Azure DevOps, Python

- **Accomplished a fully automated deployment** pipeline from code push to live rollout, measured by zero manual deployment steps, by provisioning AKS infrastructure with Terraform and orchestrating CI/CD via Azure DevOps.
- **Accomplished automated post-deployment validation**, measured by every deployment health-checked before going live, by integrating a custom Python script into the pipeline to verify application status.
- **Deployed a containerized Python application to AKS** with multi-replica scheduling and basic monitoring via Azure Monitor, leveraging simple Python health-check scripts to ensure service continuity during pod failures.

EDUCATION

- B. Tech, Electrical and Electronics Engineering | REVA University | 2021 – 2025
